PROFESSIONAL GOALS

Full-Stack Developer with proven experience delivering real-world software projects. Skilled in building scalable systems, secure APIs, and responsive web applications. I am ready to bring immediate value, solve real problems, and contribute effectively to your team from day one. Proficient in leveraging AI coding assistants (Claude, Copilot) to accelerate the SDLC while rigorously verifying output for code quality.

EXPERIENCE

Software Developer Intern

2026 – Present

Okobiz

Onsite

- Engineered **Manbazar**, a **Next.js** and **MERN stack** eCommerce platform featuring a dynamic admin UI, automated order management system, and third-party courier API integration.
- Developed **Petvet**, a dual-purpose platform combining veterinary doctor appointment scheduling with an integrated e-commerce store for pet supplies.
- Initiated development of a scalable **Pharmacy SaaS** for end-to-end pharmacy management, and deployed a customized **Advocate Profile** management system.

SKILLS

Programming & Core: JavaScript, Python, Java, C, C++, OOP, Algorithms, Systems Thinking

Backend & Architecture: Node.js, PostgreSQL, MongoDB, MySQL, MS SQL Server, Redis, REST, Event-Driven, MVC

Frontend: NextJS, React, Tailwind CSS

Tools & AI: Claude, GitHub Copilot, Cursor, Git, AWS, CI/CD, Docker, Linux, DigitalOcean, Hostinger, Antigravity

PERSONAL PROJECTS

eShopify | *React.js, Node.js, MongoDB, Redis, JWT*

[Live Link](#) | [GitHub Link](#)

- Engineered a full-stack eCommerce platform integrating SSLCommerz (bKash, Cards) with secure webhook validation.
- Improved API performance by 35% through **Redis caching** and implemented **JWT authentication** with refresh token rotation for secure user sessions.
- Designed **MongoDB schemas** and **CRUD operations** with **Cloudinary**, managing full order lifecycle.

Blogify | *Node.js, JWT, Bcrypt, RBAC*

[Live Link](#) | [GitHub Link](#)

- Developed a secure blogging platform using **JWT** and **Bcrypt** for user authentication and data protection.
- Implemented Role-Based Access Control (**RBAC**) with three roles (Guest, User, Admin) and used custom authorization middleware.

Daily Notify | *Node.js, Express.js, MongoDB, OAuth 2.0*

[Live Link](#) | [GitHub Link](#)

- Developed a full-stack productivity application using **Node.js** and **Express.js**, enabling efficient task management.
- Integrated **Google OAuth 2.0** authentication and secured passwordless user login.
- Applied **MVC architecture** to build a scalable and maintainable production-ready codebase.

PROBLEM SOLVING

Algorithmic Coding & Data Structures

- LeetCode: Solved 200+ **Data Structures and Algorithms (DSA)** problems, strengthening analytical and problem-solving skills.
- Codewars: Achieved 5 kyu rank by solving algorithmic and coding challenges.

EDUCATION

Ahsanullah University of Science and Technology

B.Sc. in Computer Science Engineering

Tejgaon, Dhaka

2021 – 2025

Milestone College

HSC (Science)

Uttara, Dhaka

2018 – 2020

RESEARCH

Malicious Comment Detection in Online Platforms

- Implemented **M-BERT**, **BiLSTM**, and **LSTM** NLP models, achieving 93% accuracy.

ACHIEVEMENTS

- Organized AUST CSE FEST 2024 and AUST CSE Carnival - 3.0 (Fall 2023).
- Organized the AUST CSE Week Coding Contest (Fall 2023).
- Champion and Organizer of the AUST CSE Football Tournament (Fall 2024).
